

CARD VAULT

The Card Vault is a specially designed transparent container that allows for quick and easy visual inspection of its contents without the need to open it. This feature enhances both security and efficiency, making it ideal for handling sensitive items such as prepaid cards, gift cards, SIM cards, or voting cards.

To ensure tamper protection, the vault is equipped with a dedicated slot for fitting a security seal (e.g., OPTISEAL). Once sealed, any unauthorized access attempt will be clearly visible, providing reliable evidence of tampering and reinforcing control over sensitive operations.

Material

◆ Polycarbonate (PC)

Applications

- ◆ Gaming
- ◆ Retail
- ◆ Banking
