

PANOSEAL

PANOSEAL is a special purpose security seal designed for use on small apertures with various wire lengths. It is an economical and practical sealing solution, widely used for utility applications where simple and reliable tamper evidence is required.

The seal is easy to apply using standard seal pliers, making installation quick and efficient in field operations. Its compact design makes it suitable for utility meters, valves, and other small locking points.

Material

◆ Acrylonitrile Butadiene Styrene (ABS)

Applications

◆ Utility Meters
◆ Utility Valves
