

SECURITY LABEL

The Security Label features a self-voiding design that provides instant visual evidence of tampering, serving as an effective theft deterrent while sealing your assets. When removed, the label reveals a hidden message, clearly indicating any unauthorized access attempt.

It is ideal for applications where seals are regularly broken for inspections, as a new label can be reapplied to the same spot. The non-transferable adhesive leaves no residue behind, ensuring a clean surface while preserving the integrity of the sealing point.

Made from high quality adhesive material, the Security Label adheres well to most non-fibrous surfaces including plastic, metal, coated paper, and glass.

Material

- ◆ Polyester (Non-Transferable)

Printing & Marking

- ◆ Inkjet Printing
- ◆ Customize Name / Logo
- ◆ Sequential Numbering
- ◆ Laser Barcoding

Dimension

- ◆ 20mm x 60mm
